

The Master Gardens are an ongoing project of the Cypress Basin Master Gardeners who plant and maintain the gardens as a horticultural demonstration and educational effort for the community and visitors.

Each bed has a sign that identifies that bed in correlation with this handout. You can use this map of our Master Gardens to help guide you through the different beds.

Front Office Beds— We have a combination of both perennials and annual to plants that do well in the hot afternoon Texas sun.

Perennial South Bed—Contains strictly perennial plants that take full sun all day. Most die back in the winter but come back year after year in the spring.

Texas Superstar® Bed— are plants that have been test and shown to thrive in the hot and dry Texas Summers. There are annuals and perennials.

To get the full run down of all of the beds in our Master Gardens, go to cbmga.org, AboutUs and click on "CBMGA Master Gardens Virtual Tour. There you will find links to all of the beds in our gardens with descriptions of the bed, the plants in the bed and the specific Master Gardener/s responsible for the bed.

We urge everyone to come and visit the Master Gardens in person, but if you can't you can see all of the beds and plants in the Virtual Tour.
